

Heidelberg Materials UK sustainability policy

Policy and scope

We are committed to managing and improving safety, health, well-being, the environment, quality, energy efficiency, carbon reduction and responsible sourcing. Our single sustainability policy follows an integrated system to meet high standards and comply with key industry certifications.

We follow all legal and regulatory requirements and keep customers informed about our products' safety and environmental impact. We work with stakeholders to develop innovative and sustainable products and services. Compliance with this policy is essential for employees, partners, and suppliers. It is regularly reviewed and shared with all key stakeholders, supporting our 2030 Sustainability Commitments for a safer, greener and more inclusive future.

We comply with ISO 9001, ISO 14001, ISO 45001, ISO 45003, ISO 50001, BES 6001, PAS 2080, National Highway Sector Scheme 16 and the relevant CE/CA certification marking schemes.

Safe and Inclusive

We place the health, safety and wellbeing of employees, communities, and suppliers at the core of our business operations by:

- Putting health and safety first, ahead of all other priorities
- Controlling workplace hazards by embedding a risk-based health and safety management system, monitoring performance, and implementing best practice
- Being a fair, aware, inclusive, and respectful company, encouraging a culture that values openness and transparency and recognises the skills, competency and achievements of our employees and supply chain
- Committing to the consultation and participation of our employees and their representatives through formal mechanisms
- Developing and implementing action plans to continually improve and ensure the health, safety, and mental wellbeing of our employees
- Continuing to develop our social value activities and making a positive contribution to our local and wider communities through our stakeholder engagement plans including a programme of employee volunteering days to work on community projects
- Collaborating with our supply chain to inform and promote wider adoption of responsible sustainable practices using local sourcing and local businesses where practical

Simon Willis

Chief Executive Officer, Heidelberg Materials UK, January 2025

Net Zero

We drive decarbonisation and provide low-carbon products by:

- Reducing Scopes 1, 2 and 3 CO₂ emissions in line with the Heidelberg Materials Group SBTi 1.5°C pathway including emissions from our manufacturing operations, within our products and from methods of transport
- Developing a carbon capture and storage plant at our Padeswood cement works and supporting technologies that lead to net zero carbon for our business by 2050
- Providing sustainable products that are low in carbon and by collaborating with the value chain support a low carbon-built environment
- Generating gross revenue from low-carbon and sustainable products

Circular and Resilient

We drive circularity to reduce and reuse materials and natural resources by:

- Using resources appropriately and sustainably and, where possible, substituting primary resources with alternative materials
- Offering circular alternatives for our concrete products
- Developing products that improve the quality and sustainability of the built environment and seeking to eliminate all non-conforming products
- Generating gross revenue from circular and sustainable products
- Adopting the waste hierarchy and reducing non-operational waste to landfill to zero

Nature Positive

We contribute to a nature positive world through our biodiversity programmes and sustainable water management by:

- Designating space for nature in all active quarries; conducting net impact assessments and promoting biodiversity net gain
- Having biodiversity management plans for all active quarries; and for all other sites within 1 km of a protected area
- Implementing water management plans and water recycling systems to reduce consumption for all sites in water-risk areas
