	Martin Wright	Clerk to Buckley Town Council
	Clerk to Penyffordd Community Council	
	Clerk to Leeswood Community Council	
	Clerk to Hope Community Council	
	Dr Graham Brown	PHW

<b>1</b>	<b>MINUTES OF THE LAST MEETING</b> NA
<b>2</b>	<b>MATTERS ARISING from the minutes</b> NA
<b>3</b>	<b>PLANNING UPDATE</b> GN – Still need to inspect the new Cement Mill, this will be organised with Hanson. GN – In discussion with Cefn Mawr to discuss a plan to ensure that stone transportation can carry on regardless of breakdowns. JC – What is the environmental impact of the new plan? GN – This will be minimal due to the site already being in operation.

	<p>GN – This will enable the plant to be running more consistently which will help efficiency.</p> <p>RJ – Will this require more stone storage?</p> <p>GN – There will be a stockpile of pre-crushed stone.</p> <p>JC – What was the breakdown?</p> <p>MB – This was from a belt head drum failure for the main crusher.</p>
<b>4</b>	<p><b>NRW UPDATE</b></p> <p>SR - Not a huge amount to report, no complaints have been received.</p> <p>SR – Two Part A notifications, 1 ring inside the kiln which makes material back up inside the kiln.</p> <p>MB – This is due to chemistry of hot-meal.</p> <p>SR – Cement Mill 3 emission breach on main stack, this was very short and happened after major overhaul.</p> <p>MB – All bags were changed at this time, and the result of the high emissions was from the fitting of the bags which can't be checked until the mill runs.</p> <p>EW – Due to the reporting timeframe a short run at the end of the day ended up in a breach of emission limit, if the mill was in operation earlier in the day then the daily average would have been within limits.</p>
<b>5</b>	<p><b>PADESWOOD UPDATE</b></p> <p>MB – CM 5 will be in operation in around 1 week, the rail loading will be delayed from April 2019 but will still happen this year. Kiln has been off for it's main overhaul period, it's currently off due to a breakdown but the Kiln will re-start on Friday. Production plan for this year still remains to produce 660,000 tons of clinker.</p> <p>JC – Go back on the emission issue on CM 3, can the emission be minimised after the work has been done?</p> <p>MB – It's difficult to prevent breaching the average based on when the mill started, in addition effectiveness of the work that has been carried out can't be checked until the mill is back in operation.</p> <p>SR – Limit which was breached was 32 mg, the limit two years ago was 30mg so the effect on human health can be considered minimal.</p> <p>CP – If the regulator is happy with the sites performance then so should the committee.</p>
<b>6</b>	<p><b>Council Response</b></p> <p>MJ – Noise issue that sounds like an animal, has returned.</p> <p>JC – Can the plant make a list of the activities which happen at around 18:15.</p> <p>MB – The last time this happened it was a cannon.</p> <p>MB – Received a suspicious email from someone who was impersonating NRW, this needs to be discussed with NRW.</p>
<b>7</b>	<p><b>AOB</b></p> <p>CP – Are Hanson still involved with Charity.</p> <p>EW – Explained that the site will hold an open day this year sometime in June, there are various other events and partnerships which Hanson are interested in this year. Any enquires can be made to site in order to assess if other partnerships with the community can be made.</p> <p>HC – Asking about future relationship with Hanson, a favour was given to Hanson for the local monitor at the bowling club. Needs clarification on applying on a regular basis for PR for Hanson based on their local events. 2,400 matches are played on the green which is important for Hanson PR, recently the carpark has been accepted by the council however they need assistance with the extension which has been provided by Hanson in the past.</p> <p>MB – The door is open for things like this as Hanson are a stakeholder, options to assist charities and non-profit organizations is possible but needs to be discussed.</p> <p><b>Date of next meeting: 13<sup>th</sup> May 2019 @ 18:00</b></p>
